

Press Release: September 9, 2022

Passenger and employee safety is our #1 priority at the Yampa Valley Regional Airport. For everyone's safety we've made significant changes to our cleaning protocols.

What does this mean?

- Hand sanitizing stations located throughout the airport
- More frequent cleaning of high-touch areas throughout the day by janitorial staff
- Electrostatic spraying throughout the airport overnight with EPA approved disinfecting solutions to kill the Covid-19 and Monkeypox viruses that may be left behind on surfaces

The federal mask mandate that required masks be worn in all airport terminal areas and while traveling on any aircraft and was lifted in April 2022. While we're happy to see all the smiling faces, we understand some might have mixed feelings. Please remember to be kind to one another and that wearing a mask while traveling is still an option for all.

Are you traveling internationally? Know before you go. Protect yourself and others.

- Get up to date with your COVID-19 vaccines before you travel
- Consider getting tested before travel
- Follow the CDC's recommendations for wearing masks during travel
- Get tested after arrival
- Check your destination's COVID-19 situation and requirements before traveling from the United States. Just as in the United States, other countries will have their own entry and exit requirements. [Click here for more information](#) from the CDC.

Respectfully,

Kevin Booth, Director  
Yampa Valley Regional Airport
