

Terminal Area Plan

Help shape the future of Yampa Valley Regional Airport!

Project Purpose

WHAT: To develop a terminal area plan (TAP) for the Yampa Valley Regional Airport that accommodates existing needs, anticipated growth, and enhances the passenger experience.

WHY: The existing terminal area facilities and design do not meet current and projected needs.

HOW: The TAP will offer short, medium, and long-term recommendations for addressing existing needs and projected growth.

Draft Report Chapters

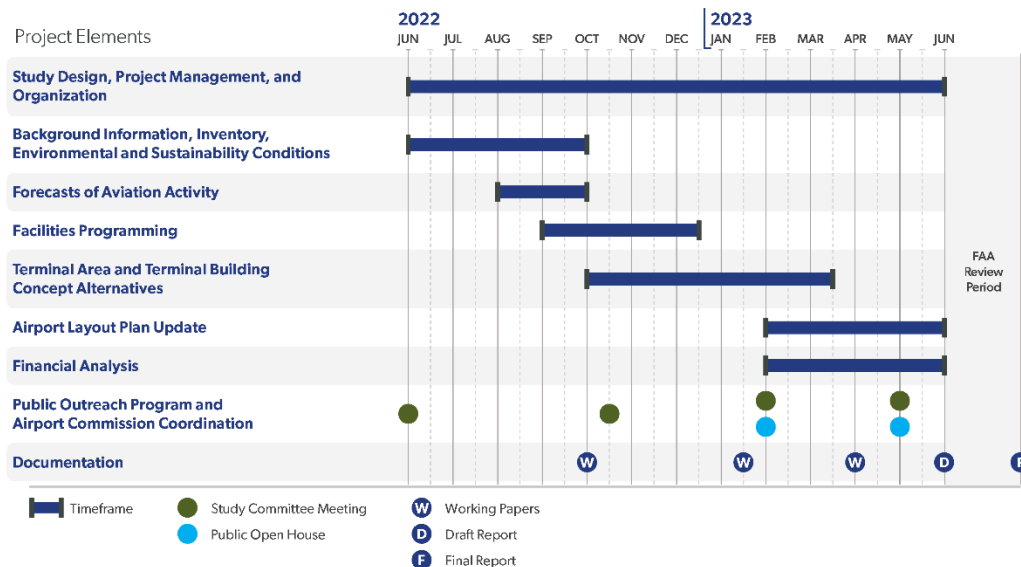

Inventory: An inventory of existing facilities within the terminal area, including the physical layout of buildings, taxiways, aircraft parking, roadways, access, and parking. The inventory includes an assessment on the condition and capacity of existing facilities.

Forecasts of Aviation Activity: estimates of future aviation and visitation demands to the Ketchikan International Airport, focused on long-term estimates for commercial passenger service.
